

What is claimed is:

1. A condiment container holder, comprising:  
a plurality of walls, each wall of said plurality of walls having a top lip on an upper portion thereof;  
a bottom operatively engaged to said plurality of walls, said bottom having a bottom lips on each end portion thereof; and  
said bottom having a condiment well formed therein.
2. The condiment container holder of claim 1, wherein said top lips and said bottom lips retain a condiment container.
3. The condiment container holder of claim 1, wherein said condiment well is adapted to receive a liquid condiment.
4. The condiment container holder of claim 1, wherein said bottom is operatively engaged to a releasable adhesive material.

5. The condiment container holder of claim 1, wherein a wall of said plurality of walls is operatively engaged to a releasable adhesive material.
